# OVERVIEW

When a customer partners with CerebrumX Labs Inc., it has to provide consent for the flow of data to CerebrumX for each OEM. The consent steps varies from OEM to OEM.

This document covers the detailed steps required by a CerebrumX customer to give consent for Stellantis, GM and Toyota vehicles.

- 1 Login to CerebrumX consent management portal
- 2 CerebrumX customer to “Add fleet” with multiple OEMs
- 3 Fleet owner to “Give consent” for each OEM

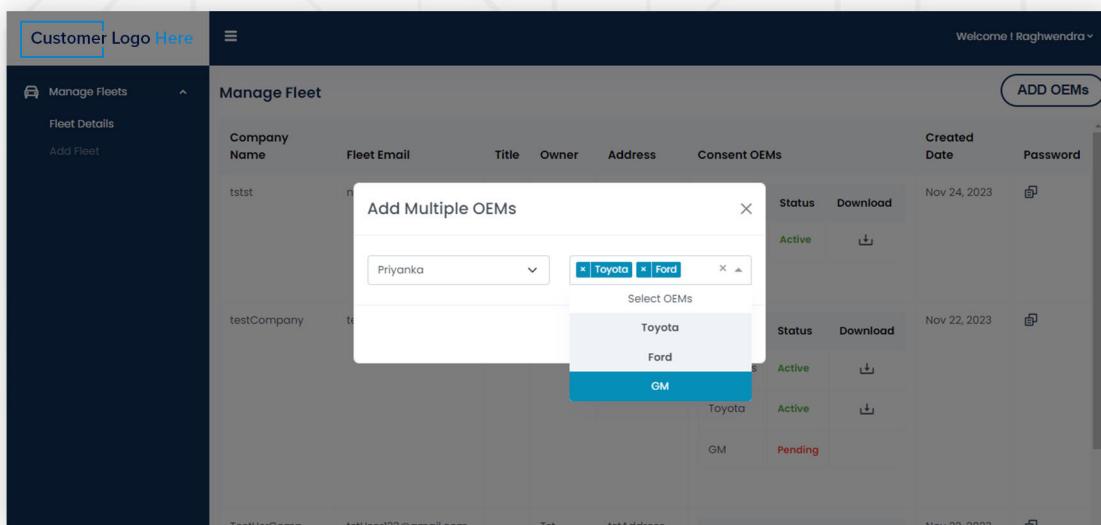

# LOGIN TO CEREBRUMX CONSENT MANAGEMENT PORTAL

The CerebrumX customer gets login credentials to CerebrumX consent management portal via email post signing the contract.

Visit <https://fleetconsent.cerebrumx.ai/> to login

**Pls note:** CerebrumX consent management portal is white-labelled and the customer can customize it with their logo and url.

- 1 Click on the “settings” tab to add logo to the portal.

- 2 To customize the url, the CerebrumX customer needs to redirect link via APIs.

## CONSENTING VEHICLES

The fleet owner can login to CerebrumX consent management portal with the credentials sent over email in Step 2.

It can accept or reject consent for a particular OEM vehicles. PI note: The fleet owner has to give consent for each OEM separately. The consent template varies for Stellantis, Toyota and GM vehicles as explained below.

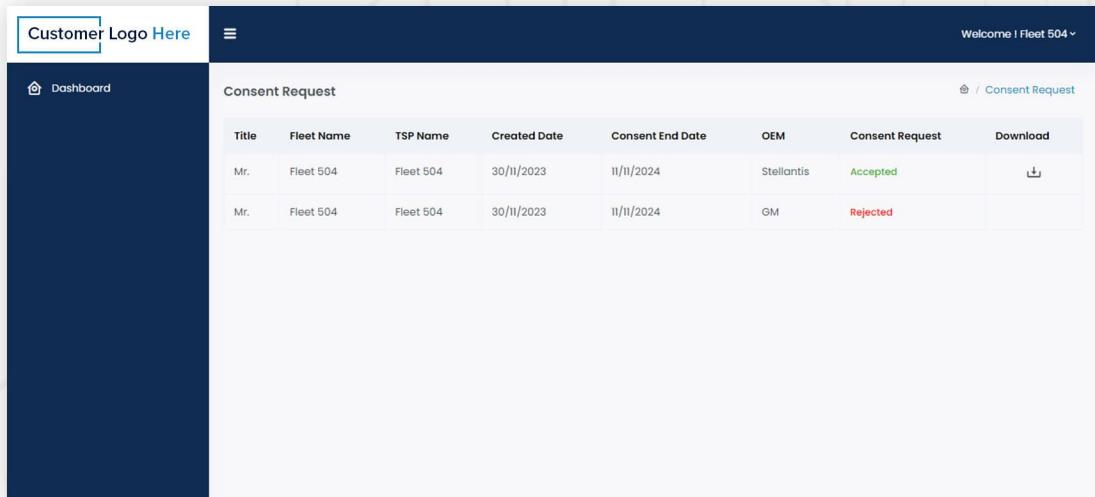

On accepting the consent, the fleet owner gets a consent template form that differs for each OEM -

- ① Stellantis consent form can be white-labeled for each customer
- ② GM would need FANID on the CerebrumX consent management portal. The fleet owner needs to input the FANID to get access to the consent template form.
- ③ Toyota consent template is exclusive and can be accessed on the CerebrumX management portal.

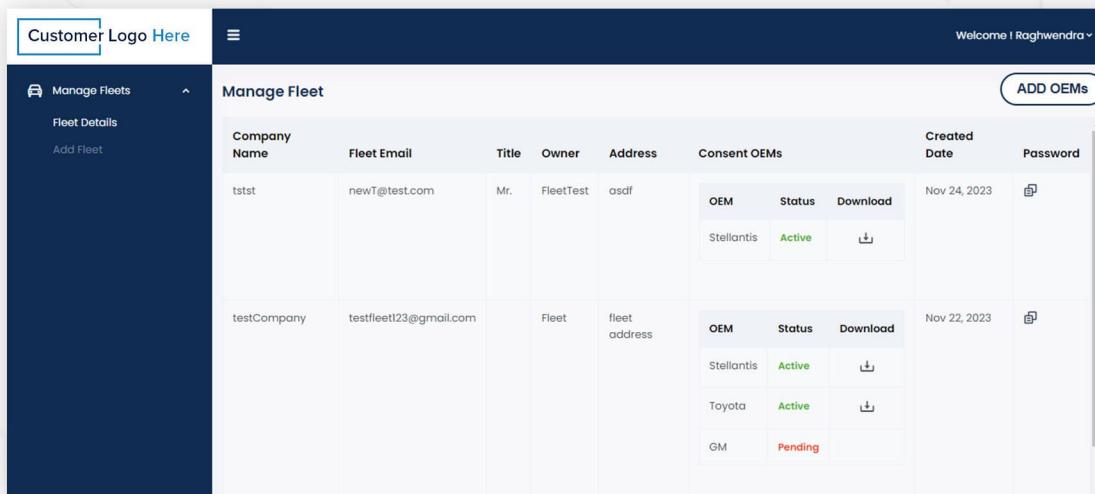

Once the fleet owner accepts and submits the consent form for each OEM, they have access to download the form on the CerebrumX consent management portal.

Title	Fleet Name	TSP Name	Created Date	Consent End Date	OEM	Consent Request	Download
Mr.	Fleet 504	Fleet 504	30/11/2023	11/11/2024	Stellantis	Accepted	
Mr.	Fleet 504	Fleet 504	30/11/2023	11/11/2024	GM	Rejected	

- 1 Once the vehicles are consented by fleet owner on the CerebrumX developer portal, CerebrumX fleet customer can check the status of consented vehicles in their account.
- 2 Additionally, the CerebrumX customer can also now access and download the consent form submitted by their fleet owner in their account. Check the consent status as “Active” or “Pending” by Fleet owner and click on the icon to download the consent form for each OEM.

Company Name	Fleet Email	Title	Owner	Address	Consent OEMs	Created Date	Password
